

Protect your home

98.6%
AIR MOVEMENT SEAL

Cleverseal® is available as part of the Garageking® product range to efficiently seal your garage from weather, insects, dust and importantly embers.

- Suitable for all garage door types including sectional, single panel and roller doors
- Quick and easily fitted for a complete seal
- Available for new or old garage doors

The Cleverseal® range consists of several combinations of Patent Pending aluminium profiles and high quality bristle brush types to comprehensively seal ALL annoying gaps including uneven surfaces eliminating messy, time consuming application of sealants.

Cleverseal® bristle brush is produced from tightly compacted flexible nylon strand that is UV stabilised and long wearing with little maintenance. US testing has proven over 2 million cycles without any appreciable wear and when correctly installed it will provide up to 98.6% of air movement seal.

With **CINDERSEAL®** you can benefit from tested and approved flame retardant bristle brush for protection in bushfire prone areas.

ALL CLEVERSEAL® AND CINDERSEAL® PRODUCTS ARE AVAILABLE EXCLUSIVELY THROUGHOUT AUSTRALIA FROM GARAGEKING®
